SKU: NXB-GEN-232-002 | Category: Controllers
& Software > Software Licenses > Simulation
Software

Overview

NexBot Drives 232-002 Simulation Software License (NXB-GEN-232-002) is a simulation software used in industrial robotics equipment where category-specific fit, electrical or mechanical compatibility, and predictable serviceability are important to buyers. The product should be understood as the exact component named by its category path, not as a complete robot or a generic service item. It supports installation, replacement, and maintenance workflows in robotic production cells by giving procurement and maintenance teams a clearly defined part class, relevant engineering specifications, and application context that matches the actual hardware being purchased.
